## To whom it may concern

### Sub: Letter of Appreciation – Qantur Technologies Pvt. Ltd.

Entecnia is a company specialized in product engineering services having its offices in USA, Europe and APAC. Entecnia's consulting experience in the global automotive industry brings a deep and solid know-how on concepts, methodologies, processes and industrial transformation, in project management and automotive standards, in order to be applied in the automotive and other fields.

Our teams from Spain and India worked along with **Qantur Technologies** for implementing best in class **ANSYS** software. We are pleased to appreciate that Qantur Technologies has supported our interest to the best of their capabilities in all areas of **commercials, consulting, Implementation, technical support, extensive training** and also helping us in having **experienced resources** at our office in India.

Their commitment of taking the ownership and responsibility of the whole process is commendable which is a challenging task upfront for companies implementing such high-end CAE tools. Also, response time of their technical team in addressing our queries and requirements is amazing.

In addition to their normal support – Their team conducted an exclusive **15 days** of training for our team representing our engineering /R&D division. They were able to experience on hand details regarding the implementation of **geometry, meshing** and **modelling techniques** which we understand will enhance their analytic skills. We have already discussed the road map for enhancing our engineers knowledge and expertise in **CFD Fluent** with their specialists.

Our special thanks to the trainer **Mr. Vishwajeet Singh** for FEA who patiently assisted our team in clearing all raised queries during the discussion.
