To Whom it may concern

This is in reference to recent training course conducted by **Qantur Technologies** on Ansys SpaceClaim software conducted at Flovel Energy Private Limited.

We are happy to inform you that the training course was very useful in familiarizing our R&D people with the software capabilities. The course contents were for the most part relevant to our needs and covered most of the features of the software, in the future we would also like to have more application-based trainings. In addition, the quality of information provided was very good.

Your application engineer was very helpful throughout the training course. He was keen to provide customization of workshops and did many hands-on examples that illustrate the concepts of modelling using ANSYS.
