To whom it may concern**Letter of Recommendation – Qantur Technologies**

FLOVEL is a manufacturer of Hydraulic Turbines & Valves, a full-line supplier of Electromechanical Equipment & Services for Small & Medium Hydropower plants including Renovation, Modernisation, Upgrading and after-market services for existing power plants and ranks amongst the leading players globally.

We recognized benefits of **ANSYS HPC & CFD** for high-speed computing simulation for turbomachinery with **Qantur Technologies**. Their team of **skilled application engineers** in the **CFD & FEA** domains conducted CFD training at Flovel, R&D centre for our engineering / R&D division. They have demonstrated the procedures and methods to perform CFD analysis for hydro turbine and its components using appropriate meshing and set up methods.

Their extensive training program enhanced our team analytical skills to perform the CFD simulation as per hydro turbine testing and operations which will help us in optimizing the profile of hydro components for better performance.

It gives us a pleasure to recommend **Qantur Technologies** for their reliable and exceptional services supporting our interest in areas of **simulation for CFD, Implementation, technical support, and extensive training**. They also helped us in finding right resource with their support for CFD which made us comfortable investing in the software.

We are looking forward to continuing this relationship with Qantur Technologies for ANSYS software and would gladly recommend them as a **trusted, reliable, transparent and Specialist Company** for any ANSYS related services.

Thanking you.
