## TO WHOM IT MAY CONCERN

Mittal Electronics is a pioneering name for home appliances. We invest significantly to enhance our R&D capabilities from time to time to innovate, design and manufacture world-class products. Mittal Electronic products are used in many countries around the world which stands testimony to the fact that we can 'Make in India' and make it really well.

As a part of our expansion of products, services and know how, Mittal Electronics has invested in ANSYS software through Qantur Technologies. ANSYS software is being used by Mittal Electronics for Design validation and optimization of the current product line

We are happy to inform you that with the training, support and technical collaboration of Qantur Technologies in Finite Element & CFD, we have been able to apply ANSYS in a quick manner and executed some complex projects along with their CFD specialist. We are extremely thankful to Qantur Technologies for also facilitating expertise consulting help for some of our complex problems in CFD & FEA. Their prompt response to our requests and project management is highly appreciated.

We look forward for more interactions with Qantur Technologies in our future projects.
